

Norkom Technologies Joins Ranks of World's Top Hundred Providers of Financial Technology

Strong revenue growth, increasing market share in battle against financial crime earn company a berth in the FinTech 100 for 2008

Dublin, Ireland and Boston, November 18, 2008 – [Norkom Technologies](#), the leading provider of financial crime and compliance software, today announced that strong revenue growth and expanding market share have placed the company on the prestigious FinTech 100 for the first time.

An annual international listing of the top vertical technology vendors that derive more than one third of their revenue from the financial services industry, the FinTech 100 is published by *American Banker* and Financial Insights, an IDC company. Norkom, which last week was named winner in the Best Anti-Money Laundering (AML) solutions category of the Annual *Banking Technology* Readers' Choice Awards, ranks 95th on the FinTech 100 for 2008.

Norkom CEO Paul Kerley cited several accomplishments that contributed to his company's growth and heightened visibility, including:

- Ten new clients during the last six months, including three of the world's largest banks
- A partnership with IBM to deliver new financial crime and compliance (FCC) software solutions
- Establishment of the company's relationship with Dubai Islamic Bank, Norkom's first client in the Middle East
- Announcement of pre-packaged compliance solutions for Newcastle Permanent Building Society in Australia, signifying the company's entry to the market segment that serves smaller financial institutions
- Strengthening global coverage through a 250 percent revenue increase, to €4.6m, in the Asia/Pacific region

"This FinTech 100 ranking is a milestone for Norkom. It is a clear signal to all that we are here to stay – through our addition of new clients, our entry to new markets, and our strengthening and expanding of existing relationships throughout the world," said Kerley.
